

I am an XM Radio subscriber and am very much looking forward to XM Instant Traffic & Weather in Atlanta and other cities. I do travel around a bit and don't always know where to find AM/FM radio stations with traffic and weather. Having XM Radio, and knowing where I can find traffic and weather reports, is very important to me. The local stations in Atlanta just do not do a good job of traffic reporting. It's not there available when I need it. XM's 24 hour traffic/weather is what I need and what I want. I urge you to reject Petition 04-160.
